OR MOSHE BOHADANA

DEVOPS ENGINEER

+972 52-244-9597

orr4353@gmail.com

Kiryat Malachi, Southern District, Israel

SUMMARY

Expert in Continuous Integration and Continuous Delivery (CI\CD) (Jenkins, CI), Ansible, Docker products (including docker-compose), Kubernetes (On-Prem), Cloud computing services (AWS), writing scripts and automation with Python, Bash, Linux and Windows server administration, terraform. In addition, experience in the network & security world.

EDUCATION

Electronics Engineer

Darka Gymnasium College
2018 – 2020

Data communications systems and encryption technicians

Hoshen center
2020

Devops Engineer

INT College
2023 – 2024

SKILLS

- Python, C, bash
- Code structure & architecture
- AWS Cloud-Based Service Management
- Continuous Integration and Continuous Delivery
- Microservices
- Automation Expert in Various Languages
- Managing Linux based and Windows based servers
- Network & Security

RELEVANT PROJECTS

- Creating a project with a full CI CD process, in collaboration with AWS, Kubernetes, Jenkins, python scripts, bash, monitoring(grafana, fluentd,)
- Creating a complete environment that works using terraform
- Writing automations to manage network devices

PROFESSIONAL EXPERIENCE

Network & Devops Engineer, Elite Tech Unit, LOTEM "SPECIALS", Jun 2020 - Jul 2024

- Leading the network and system automation team (4 engineers), which is responsible for automation scripts and workflows efficiency.
- Managing linux servers such as ubuntu, Debian,centos,RedHat.
- Experience with containers environment (Docker, kubernetes).
- Experience with Git, Jenkins and basic experience with CI/CD.
- Managing virtualization using vMware, establishing and configuring ESXI servers and virtual switches.
- Integration of large classified and operational projects with certain industries, including writing informational documents and end-to-end architecture planning.
- knowledge with AWS(ec2, s3, DynamoDB, SQS, IAM, Certificate Manager, EKS)
- Python scripts with AWS interfacing(boto3)
- Establishing and managing security and management systems (ISE, ACI, Active Directory, DNS).
- Commander of a network team(10 soldiers), working with networks protocols and Checkpoint's Firewalls, Designing and Building production network infrastructures from scratch.

MORE

- Hebrew: Native language, English: Very good level
- Very high self-study ability.
- High work ethic and ability to work under pressure.
- High ambition for excellence and development in the professional field.
